Boca Raton Regional Hospital

JOIN US!

Personalized Medicine (finding one treatment for each patient) is the new trend in cancer therapy.

Molecular diagnosis of genetic changes allow us to find new therapies for different cancers with success.

These molecular markers have been found in tissue biopsy and more recently in plasma (Blood tests) from patients.

WHERE:

The Maxwell Room • 10 S. New River Dr. East,
Fort Lauderdale, FL 33301

WHEN:

May 16, 2019

Dinner served at 5pm (EST) • Program 5:30-7:30pm (EST)
